Cluster Status & Config

Cluster Status

Show status of all cluster services on all nodes

```
cluster status
nodetool -h 0 ring
acli host.list
```

Start cluster services

```
cluster start
```

Show cluster service status

```
cs | grep -v UP
```

Stop cluster services (maintenance only!)

```
cluster stop
```

Cluster Info

Cluster name, AOS version, and other cluster parameters

```
ncli cluster info
```

List all nodes in the cluster

```
ncli host list
```

Cluster Lifecycle

Destroy the cluster — *irreversible, all data is lost forever. Never run on a production cluster.*

```
cluster destroy
```

Cluster Config Info

NTP servers configured on the cluster

```
ncli cluster get-ntp-servers
```

DNS/name servers configured on the cluster

```
ncli cluster get-name-servers
```

Host IP, hypervisor type and CVM IP per node

```
ncli managementserver list
```
