Disk Space & Foundation

Disk Space (CVM)

Find what's eating space on a CVM, sorted ascending

```
du -sm ~/* | sort -n
du -sm ~/data/* | sort -n
du -sm ~/data/logs/* | sort -n
```

Foundation / Node Discovery

See which unconfigured nodes Foundation/Avahi can discover on the network

```
avahi-browse -r -c _nutanix._tcp | grep "+ eth0" | grep IPv6
```

Restart the Avahi daemon if node discovery isn't working

```
sudo /etc/init.d/avahi_daemon restart
```

Verify Avahi is running and publishing on port 2100

```
ps -ef | grep avahi-publish
```
