Connectivity & CVM Basics

Connectivity

Quick check: which cluster services aren't running

```
cluster status | grep -v UP
```

Test network connectivity between CVMs

```
ping_cvms
```

CVM Basics

Gracefully shut down a CVM

```
cvm_shutdown -P now
```

Check whether the metadata store is enabled on a host

```
ncli host ls | grep "Metadata store status"
```

Where CVM packet-drop / latency issues get logged

```
/home/nutanix/data/logs/sysstats/ping_*.INFO
```
