PCVM & Registration

Genesis on the PCVM

Status of Genesis services on the Prism Central VM

```
genesis status
```

Registration / Multicluster

Registration status of Prism Element clusters against this Prism Central

```
ncli multicluster get-cluster-state
```

Registering/removing Prism Central in current AOS versions mostly happens via the Prism UI (Settings → Prism Central Registration) — the ncli syntax for this varies by version, so it's deliberately not listed here as a command.
