Containers & Pools

Storage Containers

List all storage containers

```
ncli container list
```

Create a new container

```
ncli container create name=<name> sp-name=<storage_pool>
```

Edit container properties (e.g. replication factor, compression)

```
ncli container edit name=<name> ...
```

Storage Pool

List storage pools

```
ncli sp ls
```

Other

Check local filesystem usage on the CVM

```
df -h
```

List a container's contents via NFS (debug)

```
nfs_ls
```
