VM Create & Modify

Create & Modify

Create a new VM

```
acli vm.create <vm_name> memory=<GB> num_vcpus=<n>
```

Clone a VM

```
acli vm.clone <vm_name> new_names=<new_name>
```

Add a disk to a VM

```
acli vm.disk_create <vm_name> container=<container> create_size=<size>
```

Add a NIC to a VM

```
acli vm.nic_create <vm_name> network=<network_name>
```

Change vCPU count (VM may need to be off)

```
acli vm.update_cpu <vm_name> num_vcpus=<n>
```

Delete a VM

```
acli vm.delete <vm_name>
```
